SUMMARY

Full Stack Software Engineer with experience in Java, Spring Boot, React, and PostgreSQL. Skilled in REST API design, unit testing, and Agile delivery. Background in ML, explainable AI, and generative AI. Open to SDE, Full Stack Developer, and Data Science roles.

EXPERIENCE

Allstate India (Feb 2025 – Present)

Software Engineer Analyst – Product Engineer (Jul 2025 – Present)

- Built and enhanced full-stack features using Java, Spring Boot, and React across insurance quoting platforms; contributed to zero major production incidents in 2025-26
- Designed and validated RESTful APIs using Postman, managed version control, branching, and code reviews via Git across Dev, Int, SV, and Prod environments
- Onboarded and released 10+ insurance carriers end-to-end - configuration, market list updates, SFTP validation, and cross-environment production sign-off, helping expand insurance product offerings on the platform
- Managed security and infra tasks: SSL/TLS certificate renewals, secret rotations, URL whitelisting, and DB credential management; supported 99.9% change success rate across releases
- Developed Playwright automation scripts for end-to-end test coverage, reducing manual regression testing effort and improving release validation efficiency
- Performed performance testing using JMeter, monitored production health using Datadog, and participated in two hackathons, including the development of an ML-based vehicle damage detection model

Apprentice Associate (Feb 2025 – Jul 2025)

- Built a full-stack e-commerce application using React, Spring Boot, and Oracle DB with user authentication, product management, and order processing via RESTful APIs
- Practiced Test-Driven Development (TDD); wrote JUnit unit tests and validated APIs using Postman

PROJECTS

Stiq - The Habit Tracker | Full Stack | github.com/NehaDhirendraSirur/Stiq-TheHabitTracker

- Built a gamified habit tracking app with streak mechanics, freeze tokens, and reward points; implemented JWT-based auth using Spring Security
- Tech stack: Java, Spring Boot, PostgreSQL, React, Vite, Tailwind CSS

GitHub Profile Analyzer | Full Stack | AI | github.com/NehaDhirendraSirur/Github-Profile-Analyzer

- Built a Next.js + TypeScript app that analyzes any GitHub profile with repo analytics, contribution heatmaps, and AI-generated developer insights via Google Gemini API
- Tech stack: Next.js, TypeScript, Tailwind CSS, Recharts, TanStack Query

Explainable AI Model for Plant Disease Detection | Team Lead | Published | github.com/NehaDhirendraSirur/XAI_with_Federated_Learning

- Trained a Federated Learning (FedAvg) model achieving 96.6% accuracy; applied LIME for model interpretability and data privacy across decentralized nodes
- Published in peer-reviewed journal (Springer- Lecture Notes in Networks and Systems (LNNS, volume 1264))
- Tech stack: Python, PyTorch, FLOWER

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript, C, C++
Frontend / Backend:	React.js, Next.js, Spring Boot, Node.js, Flask, REST APIs, JWT, Spring Security
Databases:	PostgreSQL, MySQL, MongoDB, Oracle DB, Redis
Machine Learning / AI:	TensorFlow, Keras, PyTorch, FLOWER, LIME, LSTM, Google Gemini API
Tools & Practices:	Git, GitHub, Postman, Playwright, Datadog, JUnit, Agile, Scrum, TDD, JMeter

CERTIFICATIONS

- Version Control System using Git
- Networking Basics Certificate by Cisco
- Kubernetes & Docker Course (Kubernetes & Docker) (Infosys Springboard)
- AWS Academy – Cloud Foundations
- MongoDB - From Relational Model to MongoDB's document model
- MongoDB – Aggregation Fundamentals
- MongoDB – Building AI-Powered Search with MongoDB Vector Search

EDUCATION

Bachelor of Engineering in Computer Science | 2021 – 2025

KLE Technological University, Hubballi | CGPA: 9.31 / 10

PUBLICATIONS

6 international peer-reviewed publications in Springer and IEEE conferences, covering Explainable AI (XAI), Federated Learning, Multilingual Text Classification, and Generative AI for music synthesis.
